

FAMILY

“Running in the FAMILY – Understanding and predicting the intergenerational transmission of mental illness”

Grant Agreement number: 101057529

Deliverable 9.4

Go-online of the public project website

Workpackage: WP 9
Task: Task 9.1
Due Date: 31st March 2023 (M6)
Actual Submission Date: 31st March 2023 (M6)
Project Dates: Project Start Date: October 01, 2022
Project Duration: 60 months
Responsible partner: Partner 09 concentris
Responsible author: Juliane Dittrich
Email: juliane.dittrich@concentris.de
Contributors: na

Project funded by the European Commission within HORIZON-HLTH-2021-STAYHLTH-01-02: Towards a molecular and neurobiological understanding of mental health and mental illness for the benefit of citizens and patients?		
Dissemination Level		
PU	Public — fully open (automatically posted online)	X
SEN	Sensitive — limited under the conditions of the Grant Agreement

Open Issues - not applicable

SUMMARY

On March 31st 2023, the full-flashed project website (<https://family-project.eu/>) went live to create a platform for dissemination, training and communication ensuring open access and reproducibility of research outputs (part of task 1 of work package 09).

This full-flashed website replaces the interim one-page website which went online on October 13th 2022 already and briefly summarized the project, stated its objectives, expected impact and key facts (start date, funding amount, number of partners, and project duration), and listed all project partners and important contact information.

2 FAMILY Project - public website.....	5
3 Conclusion.....	8

1 INTRODUCTION

1.1 Purpose and Scope

The full-flashed website contains much more detailed information about the project, important features for consortium members, trainees and interested scientists, as well as useful information for patients and the general public. Pages aimed at disseminating the projects results are, for example, the publications page, the news page, the press coverage page, and the download page. A training page targeted towards the project’s trainees has also been prepared in order to integrate training materials and masterclass videos throughout the duration of the project.

The website’s language is targeted at an educated but non-scientific general public, and its content will be updated with project news, new team members, new downloads, the web-version of the project’s info-brochure, key results, new publications, meetings for scientists, masterclass videos and other training materials on a regular basis as the project progresses. Click on the screenshot below to access & browse through the FAMILY project website!

1.2 References to other FAMILY Documents

- FAMILY DoA

2 FAMILY PROJECT - PUBLIC WEBSITE

The new website was developed by concentris, and its content checked, edited and verified by the project's coordinator, Prof. Dr. Neeltje van Haren from EMC. In comparison to the initial one-page website, it consists of the following new pages and features:

- 5 main navigation areas for mentally-ill persons and their families, the general public, consortium member, and interested researchers

- A contact form for every consortium member and anyone interested in the project to connect with the relevant expert, a search function for the website, and a login function for members of the consortium to access the project's confidential intranet (Keyways)

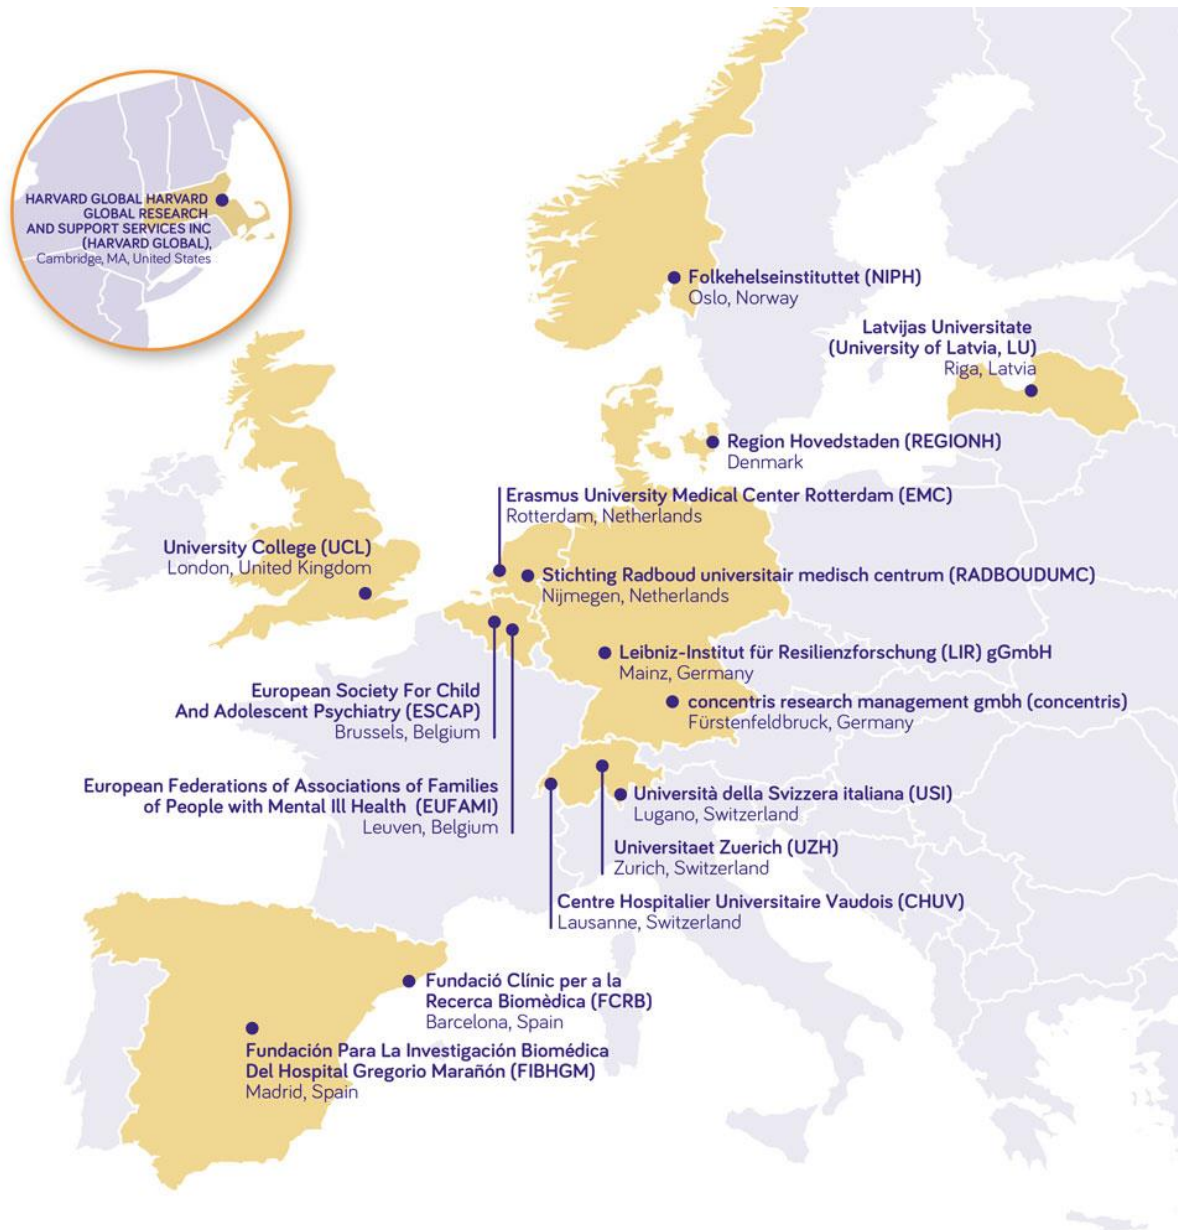

- An introductory homepage, including the most recent news & events posts and the Twitter feed

Recent Updates

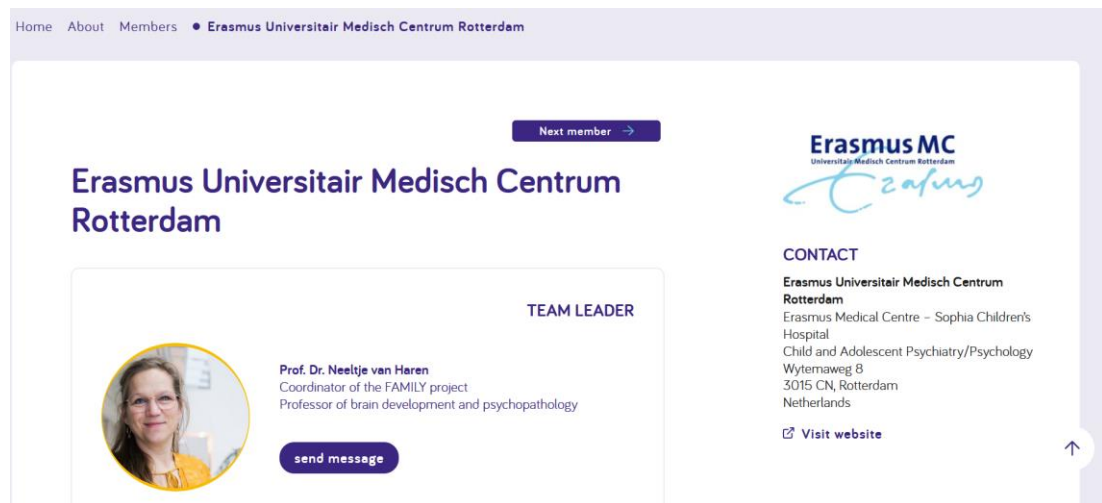

A screenshot of the 'Recent Updates' section of the FAMILY project website. It is divided into three columns. The first column, titled 'NEWS', shows a group photo of people at a meeting. Below the photo is the headline 'Kick-off meeting FAMILY project' and a short paragraph of text. The date 'November 2nd - 4th 2022' is at the bottom. The second column, also titled 'NEWS', features the FAMILY logo and the headline '“Seminar Series Epidemiology” at the University of Munster – Institute for Epidemiology and Social Medicine'. Below is a short paragraph of text and the date '28th February 2023'. The third column, titled 'TWEETS', shows a screenshot of a Twitter feed from the account @family_eu, displaying two tweets with their respective text and images.

- 17 subpages with detailed information about the project, its vision, all consortium partner institutions, internal and external committees, why it matters, useful links, downloads, the different work packages, publications, news, press coverage, relevant scientific conferences, project meetings, and a training platform for FAMILY trainees as well as other trainees.

- The project partners are presented collectively in form of an EU-map on the homepage, and individually on separate pages in form of profile pictures, contact information and a brief textual presentation of the respective institute.

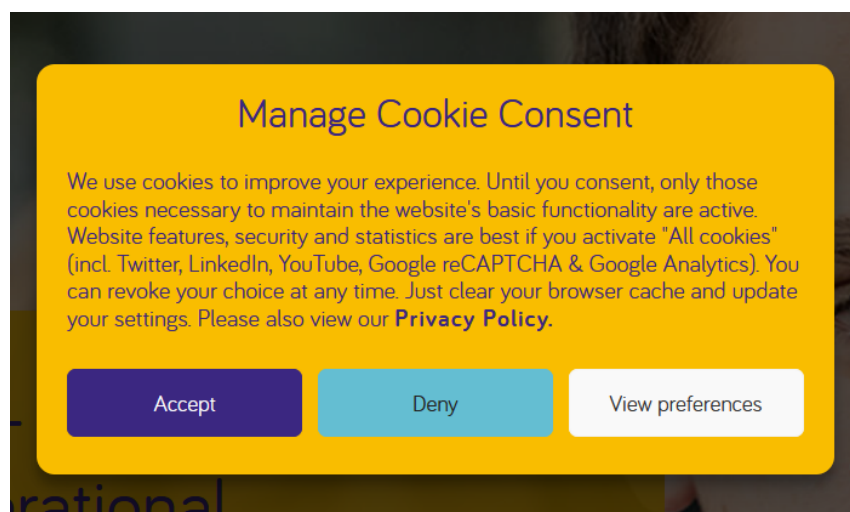

Example of an individual member page:

- The footer menu contains a link to the Horizon Europe website (https://research-and-innovation.ec.europa.eu/funding/funding-opportunities/funding-programmes-and-open-calls/horizon-europe_en), the mandatory funding and dissemination acknowledgement, useful links to the contact form, the member login, the imprint and privacy policy page, and prominent social media icons that lead to the project's LinkedIn and Twitter accounts.

- In order to comply with the European GDPR, all website visitors have to choose and consent to their cookie preferences prior to being able to browse through the website. Detailed privacy policy information is accessible on the 'Privacy Policy' subpage. The contact forms are protected with Google's "invisible reCaptcha", and the entire website is secured with an SSL certificate.

3 CONCLUSION

In conclusion, we are confident that the project website will serve as a central go-to platform for the general public, as well as chronic pain patients, study participants, and the consortium members when seeking key information about the project or wishing to contact a member of the consortium. A google analytics account will monitor the website's traffic.

ACKNOWLEDGEMENT
